

Bishop Auckland Food Festival (Gastronaut Academy)

We have taken part in the Gastronaut Academy workshops. These are food and science workshops, created by TV presenter and food/science writer Stefan Gates. It was fun, informative and memorable. Do you like trying new foods?

Lots of fun was had when we tasted a range of different foods such as: banana, cucumber, lemon, mange tout, curry powder and cabbage. Did you know that other senses effect your taste? We learnt that sight effects your perception of what something is going to taste like.

Everyone in Year 6 (including Miss Parker) dyed their tongue blue. This enabled us to inspect our taste buds. Did you know that we have over 10,000 taste buds and they are replaced roughly every two weeks?
