

# Online Safety Policy

Adopted by St Helen Auckland Community Primary  
September 2021

# Using the Online Safety Policy Template

An online safety policy provides educational settings with a framework to develop their online safety ethos and enables leaders and managers to detail strategic approaches and considerations, with regards to the safer use of technology.

The online safety policy should be recognised as a safeguarding policy, not a technical or computing policy and falls within the role and responsibilities the Designated Safeguarding Lead (DSL). There is no requirement for educational settings to have a separate online safety policy if online safety issues are appropriately addressed within other policies; this decision will be down to leaders and managers. If online safety is embedded within existing documents, settings should ensure that their community is aware of how and where to locate safety information, especially regarding responding to and reporting specific online safety concerns.

We encourage all educational settings to ensure that their online safety policy is individualised for their own specific context, to ensure that it is fit for purpose. It will not be appropriate for educational settings to adopt this template in its entirety; some statements will be more relevant to some settings than others.

This policy template requires leaders, managers and DSLs to adapt the content to include specific local information such as their own named points of contact, as well as their specific procedures and expectations. These decisions and details will vary from setting to setting, so this template should be used as a starting framework.

### c. Filtering and Monitoring

A guide for education settings about establishing 'appropriate levels' of filtering and monitoring can be found at: <https://www.saferinternet.org.uk/advice-centre/teachers-and-school-staff/appropriate-filtering-and-monitoring>

- St Helen Auckland Primary School governors and leaders have ensured that our setting has age and ability appropriate filtering and monitoring in place, to limit learners' exposure to online risks.
- The governors and leaders are aware of the need to prevent "over blocking", as that may unreasonably restrict what can be taught, with regards to online activities and safeguarding.
- Our decision regarding filtering and monitoring has been informed by a risk assessment, considering our specific needs and circumstances.
- Changes to the filtering and monitoring approach will be risk assessed by staff with educational and technical experience and, where appropriate, with consent from the leadership team; all changes to the filtering policy are logged and recorded.
- The leadership team will ensure that regular checks are made to ensure that the filtering and monitoring methods are effective and appropriate.
- All members of staff are aware that they cannot rely on filtering and monitoring alone to safeguard learners; effective classroom management and regular education about safe and responsible use is essential.

## ii **Filtering**

- Education broadband connectivity is provided through Durham County Council
- We use Smoothwall which blocks sites which can be categorised as: pornography, racial hatred, extremism, gaming and sites of an illegal nature. Schools should also be aware of the filtering detecting other safeguarding issues, such as self harm, serious violent crime or issues with county lines grooming.
- The filtering system blocks all sites on the [Internet Watch Foundation](#) (IWF) list.
- All school devices should be connected to a filtered feed. If a school device needs access to additional content, for instance to manage official social media, the filter settings for that device or user should be modified to allow access to that content.
- We work with ICTSS to ensure that our filtering policy is continually reviewed.
- If learners discover unsuitable sites, they will be required to:
  - report the concern immediately to a member of staff.
  - The member of staff will report the concern (including the URL of the site if possible) to the DSL (or deputy) and/or technical staff.
  - The breach will be recorded and escalated as appropriate.

- If a concern is identified via monitoring approaches we will:
  - Investigate the concern, log the information and provide appropriate support/ advice to the child or adult
